

Appropriation Committee. Could you go through that real quickly for me again and explain whether that will impact those existing projects.

SPEAKER BARRETT: Excuse me. The call is not raised. Would you respond, Senator Warner.

SENATOR WARNER: Yes, Senator Johnson, thank you. I should have indicated, all of the projects of the smaller communities are funded without any question. Within the total dollar amount, there was to be a \$1 million each year, '87-88, another million, '88-89, that was designated for the City of Omaha. It is my understanding in discussions that there are...that in all probability there will be federal funds available that will make up that difference so there is no problem. And as a matter of fact, what we did here by moving down a couple projects...should be able to free up these funds for the first year and enable to move down a couple, well, three or four projects on the priority list for the Resource Commission, the Natural Resources Commission, and in that it picked up funding for bank stabilization on the Elkhorn, plus it also picked up funding for a match funding, 65-35 percent by the state for Site 20, both of which are in the Omaha area. So our rationale was that since it was likely that those funds, the difference which could be made up with federal funds, and the projects were in the same general area, why it seemed appropriate to move ahead with those projects under the Resource Development Fund, and there is no interruption for those, runs in my mind there is 30 some projects that will be fully funded under the bill as it is written. That is in the mainline bill, incidentally, too.

SENATOR R. JOHNSON: Okay, that answers my question. Thank you, Mr. Speaker.

SPEAKER BARRETT: Thank you, Senator Johnson. The question is the advancement of 784. All in favor vote aye, opposed nay. Have you all voted? Please record.

CLERK: 36 ayes, 0 nays, Mr. President, on the advancement of 784.

SPEAKER BARRETT: LB 784 is advanced. The call is raised. Anything for the record?

CLERK: Mr. President, Senators Johnson and Hall would like to print amendments to 780. (See page 1993 of the Legislative
